Researcher Development Framework

Vitae is the UK organisation dedicated to the professional and career development of researchers. The <u>Researcher Development Framework</u> (RDF) identifies the knowledge, behaviour and attributes of successful researchers.

Here you can find guidance on how you can use the Vitae Researcher Development Framework to support your career. RDF Lenses provide a focus on the knowledge, behaviours and attributes required in a particular context, such as leadership, teaching, enterprise, employability outside academia, information literacy or public engagement.

The <u>Vitae website</u> has a wealth of resources and advice designed specifically for researchers, whether your ambition is to stay within or move outside academia. Vitae is dedicated to realising the potential of researchers by transforming their professional and career development through the provision of online information, advice and resources for higher education institutions and researchers on professional development and careers. These resources are available at www.vitae.ac.uk and focus on becoming a researchers; supervising/managing researchers and employing researchers of Vitae researcher booklets are available to download.

Many of these resources can be accessed only be registering on the Vitae website. Register using your @lse.ac.uk email address for full access to the resources.
